

STATIC WEATHER SENSOR "EOLOS-IND"

Wind · Air temperature · Rel. humidity · Barometric pressure
5 parameters plus dew point!

The perfect weather sensor...

for a wide range of applications, especially for use under harsh environmental conditions. The integrated sensors in the weather module are measuring the ambient parameters with high precision. The compact construction of the static measuring system and the space saving, robust housing make the sensor extremely reliable and durable.

- ▶ very high wind velocities up to 85 m/s measurable!
- ▶ without moving measuring elements
- ▶ 5 weather parameters measurable
- ▶ lamella shelter for accurate measurements of the temperature-humidity sensor
- ▶ optimal heatable
- ▶ easy installation, easy to maintain

land applications under any conditions · wind turbines · railway line monitoring · traffic meteorology · weather services and Offices of the Environment · chemical and industrial facilities · power plants, sewage plants and landfills
